

Communicate with Confidence

SDL MultiTrans
Data Sheet

SDL*

Our Mission

MultiTrans, the market-leading Translation Management System (TMS), allows you to manage content in multiple languages, supported by a full team of sector experts. MultiTrans enables users to communicate with confidence to global target audiences, streamlining complex processes while keeping costs down.

Organizations around the globe use MultiTrans to prepare, manage, approve and deliver their multilingual content. This ensures their message is clear, coherent, and delivered on time.

SDL* MultiTrans

Full featured, on-site, versatile Translation Management System

With MultiTrans you have your own localization team, with long-time expertise in all domains, in the cloud. A team of expert translators and project managers are devoted to your projects and shorten your time to market with minimal or no upfront costs.

Forget about process creation or adaptation. Externalize the bulk of the localization effort to a trusted Language Services Provider (LSP). MultiTrans FULL handles vendor management, file engineering, translation, editing – the entire process – allowing you to concentrate on delivering value to your own clients.

Control. Security. Adaptability.

The standalone TMS is quick and easy to integrate into your existing processes to manage your translation projects. It allows users to take control of the process in-house, simplifying complex workflows while delivering on quality and turnaround commitments.

MultiTrans FULL is a modular TMS that centralizes and automates your translation workflows, leverages your translation memory and unifies your terminology across your communications and organization. It is an all-in-one product at your fingertips, available both on desktop and as a Computer-Assisted Translation (CAT) tool in the cloud.

Features:

- Multilingual capabilities
- Flow module
- Textbase™
- WordAlign module
- Auto-Align Scheduler module
- TermBase module
- Connects to other tools
- Advance terminology module
- Advanced reporting capabilities
- Web Editing Server
- Web Server (for TextBase and TermBase web access)
- Customer Portal access
- Provider Portal access

Benefits

Team enhancement

Manage your localization efforts in-house, enabling your teams to enhance their translation skills.

Streamline processes

Reduce overhead with automated processes that allow you to manage routine tasks without losing control.

Reduce time to market

Automate repetitive translation and localization tasks.

Maximize long term ROI

Benefit from the Advanced Leveraging Translation Memory.

Plug and play

Streamline content management efforts by connecting MultiTrans to a wide variety of tools.

Awarded Market Leader category in Common Sense Advisory's TMS reports in 2014 and 2016.

Business-oriented TMS

- Memory functionality provides our clients with faster word processing, quick document retrieval, less repetition and less costs in general.
- Enterprise focus means a flexible solution that adapts to complex workflows. A module-based technology manages single processes or full projects.

Comprehensive TMS

- Including built-in translation memories with Advance Leveraging Translation.
- Our strong focus on business features like cost control or quoting provides a 360 view over projects.
- Keeping documents indexed in the translation memories prevents our clients from losing track of any document—especially important in heavily regulated sectors.

A suite of profiles with different levels of permissions will provide your team with global access at every step of the process. Every stakeholder is involved in the process globally.

SDL*

SDL (LSE:SDL) is the global leader in content creation, translation and delivery. For over 25 years we've helped companies communicate with confidence and deliver transformative business results by enabling powerful experiences that engage customers across multiple touchpoints worldwide.
